

January 22, 1973 was a tragic day for our country. The Supreme Court in the case Roe vs Wade ruled that killing small innocence lives was legal. Our very own judges who swore to protect justice and the common good of man completely went against their oath. All basic human rights is a matter of justice. According to the United States Declaration of Independence everyone has the right to life, liberty, and the pursuit of happiness. How did our nation get to the point to be able to abandon the very foundation which our country was built? Abortion is the end of a process; a process which has been going on for decades. A main stepping stone in this process was the new fashion which was produced. The dress for both men and women has changed dramatically. Much of what is wore today is meant to expose rather than to conceal the human body. God gave us reason, an intellect, and free will. This sets us apart from the rest of God's creatures because animals act entirely on their passions and emotions. But by this new fashion men are now turning into animals. When one wants to reduce a human being to a lesser state of life the first thing he would do is strip away the clothing. Men started to wear clothing after the fall. Since the fall, sin has crippled our minds and wills. Clothing became necessary to control our passions within us. But now this new fashion removed men's armor against vice of lust. Lust misuses a tool given to us by God for the sake of producing more life. It is so powerful for good when under control and so powerful for evil when it is out of control. Men now have become so overcome by their passion of lust. They do not want to stop using God's gift for pleasure, instead they came up with a solution – killing the life inside the womb. They call this abortion or birth control. One would be a hypocrite if they called themselves prolife but wear this new fashion. This clothing causes the sin of lust which is the very root of abortion. Human bodies are temples of the Holy Ghost. They should be respected as such. Immodesty in dress is an open invitation to impurity of thought and action. Therefore, we must be on guard and protect the modesty within ourselves setting a good example for the world around us.
